Polytechnic School

University of São Paulo

Jan. 2014—Dec. 2018

Bachelor's in Computer Engineering

Colégio Santa Cruz

Jan. 2007—Dec. 2013

Middle School & High School

Personal projects

Duper

<https://duper.dev.br>

A format that serves as a modern extension to JSON. Includes comments, temporal values, bytes, identifiers, and more. Written in Rust and available in Python, Node.JS, WebAssembly, and C#.

Sandhole

<https://sandhole.com.br>

Reverse proxy written in Rust, based on OpenSSH remote forwarding, in order to expose services behind CG-NAT. Supports HTTP and HTTPS, WebSockets, TCP, and SSH, as well as blocklists, HTTP/2, rate-limiting, admin panel via SSH and more.
